Dr. Chrysoula Liakou

**Acceptance of EU Prescriptions by French Pharmacists::**

Under Directive 2011/24/EU and French law, including the Code de la Santé Publique and related regulations on medicines, French pharmacists are required to accept prescriptions issued in other EU countries, provided they meet the necessary standards. This includes the patient's and prescriber's details, dosage, and the common name of the medication.

Refusing a legitimate prescription violates EU law and national regulations, restricting cross-border healthcare rights.
